## View Records of Employment (ROEs) on Preview Payroll

---

When you preview your payroll, you will now have the ability to review your Records of Employment (ROEs) before ADP electronically submits them to Service Canada on your behalf. This will give you the opportunity to verify the accuracy of the information on your ROE and eliminate potential errors before it is sent for processing.

If you are a direct filer with ADP Canada, then the ROEs are produced on previewing payroll when there are no processing errors.
