New Employee Payroll Summary Report

As part of ADP's ongoing commitment to deliver optimal user experience, we are delighted to announce the launch of a new and improved version of the Employee Status report, known as **Employee Payroll Summary**! This report is produced when a new employee is hired or when there is a change in the status of an existing employee.

Employee Payroll Summary is a modern report designed to provide relevant data in an informative user friendly layout and descriptive format. Data is organized in logical groupings, which allows you to easily locate employee information. This new report also gives you the ability to view your employees' payroll information in appropriate categories, such as the following:

- Payment
- Taxes
- Pension and Benefits
- Position Changes/Transfers

The **Employee Payroll Summary** report will be available in Current Year and Year End. The new report can be accessed in the same manner as the existing Employee Status report.

Note: The existing Employee Status report will continue to remain available as a reference.
